**Don't miss it!** Monarch Research is proud to bring world-class author and speaker, Dr. Doug Tallamy to Iowa this October. Together with our partner organizations, we're scheduling several opportunities to hear first-hand from one of the nation's foremost environmentalists.

Speaking directly to homeowners, Tallamy will deliver real-life examples and tips to help us see the reality around us and make permanent changes.

Recent headlines are a bleak reality check about how ineffective our current landscape designs have been at sustaining the plants and animals that sustain us. Tallamy will discuss simple steps that each of us can and must take to reverse declining bio-diversity and will explain why we, ourselves, are nature's best hope.

*"He's a game-changer when it comes to really understanding nature and how we can all work to create an environment that thrives," offers Clark McLeod, founder of Monarch Research. "This is Dr. Tallamy's third visit to our community and he continues to be a primary inspiration for everything we do at MR."*

Presentations will be held at venues in Cedar Rapids and Marion. Dr. Tallamy will speak at the MR Event Center as well as events organized by ISU Linn County Extension Master Gardeners, College Community Schools, and Indian Creek Nature Center.

Dr. Tallamy's most recent book features one of Iowa's most impressive native trees, the Oak.

A book signing will take place before and after each speaking event. Visit our website to learn more.
